

Glasgow

SMALL TABLES

A central table that combines the simplicity of the contemporary design with a complex manufacturing: the 10mm thick metal structure supports the weight of the console giving stability to the whole, thus creating an original game of contrasts between lightness and stability. Enriched by decorative ropes running along the outer perimeter of the base, the central table is equipped with a refined laminated and ground bronzed glass top.

Central table with structure in metal with bronzed finishing. Coupled glass top (extra clear + bronzed) and decorative ropes. Details in bronzed finishing.
