

Jenga

SMALL TABLES

Pure volumes and essential lines: these are the main features of the Jenga central table. A composition with a refined design that is expressed in the succession of light and dark glass rectangles, assembled at 45° and joined without showing grafts or joints. The entire structure is made of glass and the whole piece is revealed to the eye as a unique light and refined block. In a surprising game of colors and geometries, the combination of light and dark glass is reinterpreted this year in a new chromatic palette, combining satin extra-clear and smoky glass.

Central table with structure in smoky and satin extra clear glass. Tips in bronzed finishing.
